

Field Gauge™ for Smart Fieldmeter®

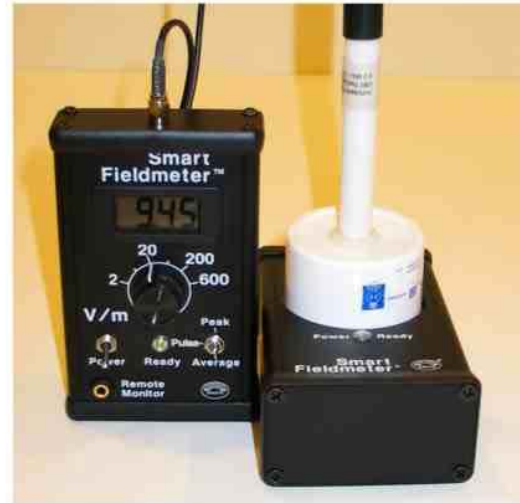

Field Gauge™ - is a convenient performance tester for **Smart Fieldmeter®** instruments. It allows user to get the instantaneous verification of the instrument, including the probe, meter and meter-probe cable.

Operation verification takes only a few seconds and eliminates most of the uncertainty related to instrument setup.

Operation of the **Field Gauge™** is extremely simple: Place the probe (connected to the working meter) inside the **Field Gauge™** opening and push slightly the end button switch. Green LED will turn on, indicating that test field has been created. Read the meter. The displayed meter reading should be within the limits specified for each probe model. That's it!

Field Gauge™ is compatible with all **Smart Fieldmeter®** broadband probes. This includes all **PI-01, PI-02 and PI-03** broadband probes.

Purchasing the Field Gauge™:

You may find more information about our products and **Field Gauge™** from our web site: www.emctd.com.

To inquire about **Field Gauge™** and other **Smart Fieldmeter®** products, send us an e-mail: exid@emctd.com.

Or give us a call: **508-292-1833**.

We can arrange the demonstration of **Field Gauge™** by our distributor in your country.
