

BM-100/2000 Biconnical Monopole Antenna

Specifications

Electrical

Freq: 100 to 2000 MHz
Gain: 3.8 dB (Fo)
Pwr: 100 Watts (CW)
Pol: Linear (Vertical)
VSWR: 3.0:1 (maximum)
HPBW: 360 x 85 Degrees (Fo)

Mechanical

Dimensions: 3.0" x 12" (antenna)
Weight: 4 lbs. (antenna)
4.8 lbs. (antenna with
Mag Mount)
Connector: Type N (female)

The BM-100/2000 Biconnical Monopole Antenna is an extremely wide band antenna. This rugged antenna is ideal for test, EW and field use

All of our antennas and systems are designed, machined, assembled and tested in house at the PRC-COM facilities in Las Cruces, NM allowing us to provide quick and cost effective solutions.

The antenna is offered as a stand alone unit and is available with an optional attachable +19dB LNA (provided with 5VDC power supply), Mag Mount (for vehicle mounting) and a rugged flight case.
