

Turn Device DE3330-RH

Total height of rotation axis

Max. load

Material rotation plate

Material bottom & side

Positioning Accuracy

Rotating angle

Rotating time

Motor

Drive unit

Temperature working range

Input current

Operating voltage

1702 mm (above base plate)

2 kg

Rohacell, with dielectric constant below 1.2

Körmacell with PVC profile

+/- 1°

0°...90°

max. 2,3 r/pm

electronic EC motor 150 W

shielded and radio interference suppressed; 20dB

under CISPR 22 Class B

+5 °C...+40°C

max. 1,6 A

115 V / 230 V AC (50/60Hz)

Brief description

The DE3330-RH light duty turn device is specifically designed for measurements of medium sized equipment with cable assembly. With the exception of the drive only plastic and Rohacell components are used. The turning plate is equipped with holes and fixing bolts, cables and equipment can be mounted within the rotating axis.

The turn device DE3330-RH exists of a steady bottom plate containing the drive unit, which is preferably fixed on a support table.

The GPIB (IEEE 488) bus, when operated with the CO2000 Controller, or GPIB (IEEE 488) & LAN

(TCP/IP), when operated by CO3000 Controller provides an additional control option for all functions.
