

XYZ120815

Length (X) Width (Y) Height (Z) movement X-axis movement Y-axis Drive unit

Motor Current Voltage 1194 mm 800 mm 1501 mm 700 mm 1200 mm 1000 mm shielded and radio interference suppressed; 20dB under CISPR 22 Class B 3x 150W max. 3 A 230 V / 50 Hz

Brief description

The **3** Dimensional Positioner **XYZ**120815 is designed to support the automation of **RFID** Transponder measuring in continues or step by step movement. The base is specifically designed for the size of a **EURO-pallet** $1.2 \ge 0.8 \text{ m}$ (L x W)

All three axis can be operated **independent** and at the **same time** to shorten the measurement.

Metal parts are located only in the drive mechanism (max. 0,3 m above ground level). Limit switches and the general mechanical design ensure a reliable system operation.

The IEEE 488 (GPIB) bus, when operated with the CO2000 Controller, or IEEE 488 (GPIB) & TCP/IP (LAN) interface, when operated by CO3000 Controller provides an additional control option for all

functions.

It is possible to design the XYZ customized upon request.
